## PROFILE • ABOUT ME

I am a detail-oriented frontend developer and software/technology enthusiast with a good coding mindset and comprehensive knowledge in React Native cross-platform Mobile Application development, have worked in domains such as Healthcare, Fintech, and eCommerce Application projects in which I have been part of from inception phase to deployment phase.

I love to work with and contribute my software development skills to people who share my passion for contributing to society in specific or in general with the software they built, with whom I have learned a great chunk of knowledge and awareness in the software domain and about other disciplines as well. I have always tried to put forth my ideas, knowledge, suggestion, and opinions in a proactive way during the brainstorming phases and during the day-to-day basis of the development lifecycle, keeping an open mind towards the same given by my fellow team members.

I wish to continue being part of organizations that nurtures the software development skill in me, guide me to be a good human being, and where I could use and enhance my knowledge, and talent for the development of both the organization and myself.

## WORK EXPERIENCE

### React Native Developer

Hexims IT LLC, Bengaluru

Feb 2022 - Current  
Bengaluru, Karnataka

- Developed and implemented a fully functional vinyl sales application using React Native and adhering to industry best coding practices.
- Successfully integrated various relevant libraries such as React Navigation, React Native Maps, and React Native Elements to improve the user experience and functionality of the application.
- Integrated payment systems such as Stripe and Mangopay to provide users with a seamless and secure checkout process.
- Implemented OAuth integration with popular social media platforms including Google, Facebook, Instagram, and WhatsApp Business API to enable users to log in using their existing accounts.
- Configured and integrated Sentry to monitor and track application errors and crashes in real-time, allowing for quick and effective debugging and issue resolution.
- Collaborated with a team of developers, designers, and stakeholders to ensure project milestones and deadlines were met.
- Conducted regular code reviews and implemented improvements to maintain code quality and ensure scalability of the application.
- Provided technical support and troubleshooting to clients and end-users as needed.

- Implemented and maintained a continuous integration/continuous deployment (CI/CD) pipeline to ensure frequent and efficient updates to the application.
- Created and maintained comprehensive documentation for the application, including user manuals and technical documentation for developers.
